

Saint Joseph

REHABILITATION *and*
NURSING CENTER

October 22, 2020

To Our Residents, Family Members and staff:

Earlier this week we informed you that a staff member at Saint Joseph Rehabilitation and Nursing Center received tested positive for COVID-19. We immediately initiated our re-emergence protocols, which included testing of all residents and staff. Saint Joseph Rehabilitation and Nursing Center is happy to report that we tested 124 staff members and 105 residents and all were negative. We continue to keep our staff member that tested positive in our prayers for a speedy recovery.

We will continue to provide you with updates on our website. Please visit stjosephrehab.com for details.

Sincerely,

Jeffrey Diminico

Jeffrey Diminico, Administrator
