

11.29.22

St. Joseph's Rehabilitation and Nursing Center is currently experiencing cases of COVID-19 in this facility. Please be assured that all infection control containment measures required by the CDC and the MA Department of Public Health are being followed. While visits may continue, we strongly discourage you from doing so until further notice.

If you decide to visit, a face mask must be worn at all times. It is suggested that you limit the locations within the facility in which you travel.

If you have any questions, please direct them to our management or nursing supervisors.
